Presentation

The subject “Resources for social design and innovation” provides us with different tools to manage the data obtained through the different methods of cocreation and participation to address social issues and explore and facilitate new forms of collaboration. It contributes the management of the social design process and shows us examples of how to visualize, sort, classify and optimize data, and identify key values in the development of design projects linked to the challenges we face as a society. The approach of the subject is practical and combines theoretical aspects with examples and case analysis.
